GUTTA PERCHA TUBING.

MANY inquiries having been made as to the *durability* of Gutta Percha Tubing, the Gutta Percha Company beg to call attention to the following Extracts of Letters from parties who have used it for a considerable length of time :—

From Sir RAYMOND JARVIS, Bart.

"Ventnor, Isle of Wight, March 10th, 1852.

"In reply to your letter respecting the Gutta Percha Tubing for Pump Service, I can state with much satisfaction it answers perfectly. Many Builders and other persons have lately examined it, and there is not the least apparent difference since the first laying down, now several years; and I am informed that it is to be adopted generally in the houses that are being erected here."

From C. HACKER, Esq. Surveyor to His Grace the DUKE of BEDFORD.

SECOND TESTIMONIAL (AFTER TWO YEARS' TRIAL).

"Office of Works, Woburn Park, January 10th, 1852.

"In answer to your inquiries respecting the Gutta Percha Tubing for Pump Suctions, I find that the water has not affected it in the least, although it will eat lead through in two years. We have adopted it largely, being cheaper than lead, much easier fixed, and a more perfect job."

☞ *The Company's Illustrated Circulars, containing copious information relative to the various applications of Gutta Percha, together with full directions to Plumbers for joining tubes, lining tanks, &c. will be forwarded (post-free) on receipt of three postage stamps.*

THE GUTTA PERCHA COMPANY, PATENTEES, 18, WHARF-ROAD, CITY-ROAD, LONDON.

ARCHITECTURAL PUBLICATION SOCIETY.
NEW AND IMPORTANT WORK.

THE DICTIONARY OF ARCHITECTURE.

WYATT PAPWORTH, Esq. Honorary Secretary!

From whom copies of the Annual Report, describing this work, may be obtained.

14a, Great Marlborough-street.

NOW READY, Price 10s.

HYDRAULIC AND TIDE TABLES,

TO AID THE CALCULATION OF WATER AND MILL POWER, WATER SUPPLY, DRAINAGE, AND NAVIGABLE RIVERS; WITH SYNOPSIS OF RAIN-FALL IN GREAT BRITAIN.

Together with

THE PROPERTIES AND STRENGTH OF MATERIALS; USEFUL NUMBERS; POWERS, ROOTS; AND LOGARITHMS.

BY NATHANIEL BEARDMORE,

Member of the Institution of Civil Engineers.

The First Edition of this Work was received with much greater favour than the author had at all expected; and the sale w[illegible] large, for so technical a work. To extend the use of this edition as a hand book for the Engineer, in matters relating to Hydraulics and Hydrodynamics, many new Tables have been constructed, and Tide Tables are inserted at the close of the book, chiefly compiled from the data offered in the Admiralty Tide Tables and from the Nautical Almanac.

The introductory remarks on the use of the Tables, have been amended, and more information is interwoven, chiefly on our English rivers—the drainage areas of the more important of which have been especially computed from the Ordnance Map. In the original remarks on tides and rivers, experience and practice are the great guide; and therefore, to obtain the best data for practical results we have carefully collated all the well-authenticated data within our reach on personal experience, and had them condensed into tabular forms.—*Preface to Second Edition.*

WATERLOW and SONS, Parliament-street, Westminster; Birchin-lane; and London Wall, City;
WEALE, 59, High Holborn; BLACK, Edinburgh; J. and J. THOMSON, Manchester; WEBB and HUNT, Liverpool;
